EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with M. Williams on 29 August 2006.

The application has been amended as follows:

- a. claim 1, lines 16-17, "said infant restraint system" was replaced with --said infant restraint system wherein said first and second components of said infant restraint system are encapsulated by said first child seat portion and said second child seat portion when said second child seat portion is in its closed position--;
- b. claims 13-20 were canceled.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 8-12, directed to the species of Figures 5A-5D no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including

all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The following is an examiner's statement of reasons for allowance: U.S. Patent No. 4,900,087 to Crisp teaches a seat assembly wherein the first and second components (see Fig. 3) of the infant restraint system are attached to an insert 42 that is removed when the second child seat portion 30 is in its closed position atop first child seat portion 28, and U.S. Patent No. 5,516,194 to Maule teaches a seat assembly wherein the infant restraint system has a component 62 (see Fig. 8) on the first child seat portion 32 that is encapsulated when the second child seat portion 30 (see Fig. 3) is in its closed position but fails to teach a second component of the infant restraint system on the second child seat portion. Therefore, the prior art fails to teach or make obvious a seat assembly having a first component of an infant restraint system on a first child seat portion pivotally interconnected to a vehicle's backrest, a second component of the infant restraint system on a second child seat portion pivotally interconnected to the first child seat portion wherein the second child seat portion has a closed position when adjacent to the first child seat portion such that the first and second portion of the infant restraint system are encapsulated by the first and second child seat portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph F. Edell whose telephone number is (571) 272-6858. The examiner can normally be reached on Mon.-Fri. 8:30am-5:00pm.
